

## High School Equivalency 4<sup>th</sup> Pathway using Regents Exams

Did you pass one or more Regents Exam prior to leaving high school? New York State now offers GED® Exam credit for Regents exams you passed while in high school.

The following chart shows what GED® Exam credit you get for each Regents exam:

<u>Regents Exam</u>	<u>GED® Exam Content Area Credit</u>
Any Math Regents	Math
Any Social Studies Regents	Social Studies
Any Science Regents	Science
Any ELA Regents	Reasoning through Language Arts

### How does it work?

- You download and print an [Attachment R](#) from the NYSED.gov website
- You fill out Section A
- You bring the Attachment R to your most recent school district and give it to their guidance department
- The school district then fills out Sections B and C indicating the Regents Exams you have previously passed
- The school district sends the completed Attachment R and a transcript to the HSE office in Albany
- Albany processes the Attachment R and sends you a transcript indicating the GED® credit you are receiving
- You then sign up to take the GED® in only the content areas you have not received credit for

All passing Regents Exam scores count, it does not matter if you took the Regents Exam in 2016 or in 1962! If you passed it, it counts. If you have questions about the 4th Pathway, the Attachment R, or anything else GED® Exam related, call The Center for Learning today!
