NEW PHARMACY CARE MANAGEMENT PROGRAM EFFECTIVE 1/1/2024

We are proud to introduce the Keenan Pharmacy Care Management Program, **KPCM** powered by US-Rx Care. This new program is designed to help reduce your out of pocket prescription spend. **KPCM** is an innovative program which analyzes your prescription drugs and communicates with your doctor on quality of care and cost-saving opportunities.

KPCM is dedicated to providing the highest level of care and the most cost-effective pharmacy solutions. The focus of the program is to present you with the right drug for the right price while keeping drug interactions and safety top priority. This involves periodic communications with your doctor to ensure the correct drug at the right dose is provided to you.

There are no co-payment or formulary changes.

At times, **KPCM** may call you to discuss pharmacy care options. These calls and your prompt reply may provide opportunities for you to save money.

You may also choose to proactively call **KPCM** and complete a medication review which will begin the process of contacting your doctor to identify potential cost-savings.

If you have any questions regarding this program or to complete a proactive medication review, please contact **KPCM** at 1-800-241-8440.
