Battery Management

Your Jetpack is equipped with a replaceable rechargeable battery. It will work from its charged battery alone, or when the device is plugged into a power source.

Note: Please do not attempt to open or disassemble your Jetpack and the battery pack. Doing so may cause damage that voids your warranty.

Charge the battery by plugging in the charger provided together with your Jetpack. While the battery is charging, the battery charging icon displays, and the power button illuminates red .When the battery is charged, the battery icon is solid , the power button illuminates green .

IMPORTANT! Please use only an approved charger to charge your Jetpack. Improper handling of the charging port, as well as the use of an incompatible charger, may cause damage to your device and void the warranty.

Charging the Battery

Before using your Jetpack, ensure that the battery is fully charged. Be sure to use the charger that came with your Jetpack.

NOTE: Your Jetpack is equipped with a replaceable rechargeable battery. When handling the battery or SIM card, please make sure the device is not connected to any power sources. Do not use any tools, sharp objects or any utensils when dealing with the battery. Doing so may cause damage that voids your warranty.

- It normally takes at least 3~5 hours, depending your power sources and device status to fully charge the battery.
- The battery discharges faster as additional devices connect with your Jetpack.
- Battery life depends on the network, signal strength, temperature, features, and active connection time.
- When charging, keep your Jetpack near room temperature.
- Never leave the Jetpack in an unattended vehicle due to uncontrolled temperatures that may be outside the desired temperatures for this Jetpack.
- It is normal for batteries to gradually wear down and require longer charging time.
