

Connecting your Windows device to your home WiFi or Hotspot

Windows Device (Laptop)

1. Power up your Laptop by pressing the power button  The power button is located at different locations depending on the make a model.

2. At your main Windows Screen locate the WiFi symbol.  It is located at the lower right of the main screen.

3. Selecting the icon will bring up a window displaying all the wireless networks available to you.

4. Select the network you would like to connect to and enter the password, if prompted. ***The networks listed in the menu above are for examples only.***
5. If you are connecting to a WiFi hotspot, the name of the network (SSID) will appear in your list of choices.
