TechTrek

Instructor Matt Champlin

Join us for an unforgettable journey where budding tech enthusiasts explore the latest innovations, learn coding fundamentals, build computers, and take flight with drone technology. Our camp offers a dynamic blend of hands-on activities, engaging workshops, and outdoor adventures, making it the ultimate destination for young minds hungry for knowledge and adventure. Students will have the opportunity to learn the basics of computer technology and repair, basic networking, and the underpinnings of drone technology and be able to showcase their flying skills as we capture images and videos of the entire summer camp!

**NOTE: Campers are to bring a
bag lunch and waterbottle each day**

The Choice is Yours!

What do you want to be when you grow up? How many times has someone asked you that? Now is the time to learn and discover!

Are you "handy"? If so, and you are thinking about a career where you will work with your hands, consider the Arc & Sparks, Auto Repair, Construction, or Heavy Equipment camps.

Maybe you are the type of person who is interested in a high-tech career that involves drones, digital cameras, and/or computers, then TechTrek and Film Production camps might work for you.

This is for campers that are going into 7th, 8th or 9th grade in September 2025. It is free to register your child for camp, space is limited to 12 campers per program.

Please indicate 1st and 2nd choice on the registration form.

Arcs & Sparks

Instructor Jerry Meyer

Ignite your creativity and explore the world of welding at our hands-on Arcs & Sparks camp.

Campers will delve into the fundamentals of welding and metal fabrication, including MIG welding, plasma cutting,

and torch cutting techniques. Under the guidance of experienced instructors, participants will work on real-world projects, learning essential skills such as safety protocols, tool usage, and design principles.

This immersive experience not only fosters technical proficiency but also encourages problem-solving, teamwork, and confidence-building. By the end of camp, students will have created their own metal art pieces to take home, sparking a lasting interest in the skilled trades and potential future careers in welding and fabrication.

Auto Repair

Instructor Scott Martin

Would you like to learn more about working on vehicles? If so, the summer automotive program is just for you! This program will expose students to industry safety standards, how to operate equipment, hydraulic systems, auto lifts, and more! Students will have the opportunity to gain hands-on experience working on vehicles with different tools.

Construction

Instructor Tom Hayden

If you are interested in learning more about the construction industry, this is the perfect camp for you! In this camp you will learn about the tools and techniques necessary for construction, while participating in introductory projects with wood and masonry. Students will have different projects to choose from to meet their interests. There will also be exposure to safety regulations and job opportunities.

Film Production

Instructor Terry Cuddy

Lights, Camera, Action! If you want to learn movie industry practices and techniques while making a short film then this is the camp for you! Campers will write a script, storyboard, shoot and edit a film. They will rotate production roles (actors, boom operators, slate operators, and directors) during the shoot. Once shooting is complete, they will edit and publish their short film share with friends and family.

Heavy Equipment Operation

Instructor Cale Jirinec

If you have always dreamed of operating heavy equipment such as excavators, backhoes, and bulldozers, then this is your opportunity to estimate, measure, and complete an earthmoving project. All campers are trained in the safe operation of heavy equipment. Learn valuable hands-on skills and understand the basic principles of heavy equipment.
